Sodium
Biological transport
Bladder epithelium, toad, 371
Colon epithelium, toad, 371
Respiration, 127

Sodium (cont'd)
Cations
Ion channels, 193
Ion currents, 193
Depolarization
Ion channels, 39, 57
Electrochemistry
Glass microelectrodes, 209
Epithelium
Biological transport, 127
Oxygen consumption, 127
Respiration, 127
Gating currents
Membrane potentials, 39
Ion currents
Membrane potentials, 39
Potassium
Adenosine triphosphatase, 127
Strychnine
Ion channels, 57
Ion currents, 57
Strychnine, *N*-methyl-
Ion channels, 57
Squid, 57
Temperature
Ion channels, 193
Ion currents, 193
Thyroid hormones
Biological transport, 127
Oxygen consumption, 127
Respiration, 127
Water, heavy
Biological transport, 193
Ion channels, 193
Ion currents, 193
Kinetic models, 193

Sodium chloride
Cell membrane permeability
Biological transport, 165
Epithelium
Biological transport, 165

Spectroscopy
Diffusion
Gramicidins, 455
Light scattering, 455
Gramicidins
Dimethyl sulfoxide, 455
Dioxane, 455
Light scattering, 455
Methanol, 455
Spermatozoa
Cell movement, 187

Spermatozoa
Cell movement
Light scattering, 187
Normal density functions, 187
Spectroscopy, 187

Spin-lattice relaxation
Gels
Phase shift, 339
Liquid crystals
Phase shift, 339

Steady state
Electric current
Biological transport, 237
Mechanoreceptors
Cell movement, 277

Striation
Filaments
Backbone substructure, 423
Myosin
Filaments, 423

Strychnine
Gating currents, 57
Sodium
Ion channels, 57
Ion currents, 57

Strychnine, *N*-methyl-
Gating currents, 57
Sodium
Ion channels, 57
Squid, 57

Synapses
Acetylcholine
Decay, 145
Diffusion, 145
Endplate currents, 145
Nerve endings, 145
Acetylcholinesterase
Electric potential, 145
Temperature, 145
Laplace transformation
Cell membrane permeability, 267
Neurons
Laplace transformation, 267
Receptors
Electric potential, 145

Systolic pressure
Balloons
Blowouts, 301
Myocardium
Membranes, 301

T

Temperature
Dipalmitoyl phosphatidylcholine
Birefringence, 15
Lipids
Annealing, 393
Sodium
Ion channels, 193
Ion currents, 193
Synapses
Acetylcholinesterase, 145

Tetrodotoxin
Lidocaine
Gating currents, 39

Thermal decomposition
see Pyrolysis

Threshold functions
Wilson-Cowan equation

Threshold functions (cont'd)
Neurons, 267

Thyroid hormones
Sodium
Biological transport, 127
Oxygen consumption, 127
Respiration, 127
Triiodothyronine
Oxygen consumption, 127

Transition temperature
Gangliosides
Phosphatidylcholines, 325
Liquid phases
Gels, 339
Phase shift
Phospholipids, 339

Triiodothyronine
Thyroid hormones
Oxygen consumption, 127

U

Ultrastructure
Myosin
Proteins, 433
C-protein
Filaments, 433
Myosin, 433

Ultraviolet rays
see also Near ultraviolet radiation
DNA
Pyrimidine dimers, 287
Replication fork, 287
Fibroblasts
DNA, 359
DNA repair, 359
Proteins, 359
RNA, 359

Uridine, 5-bromo-2'-deoxy-
Near ultraviolet radiation
Caffeine, 75
Cell cycle, 75
Chinese hamster cells, 75
DNA, 75

V

Vasopressin
Electric potential
Bladder epithelium, toad, 371
Colon epithelium, toad, 371

Voltage
see Electric potential

W

Water
Dipalmitoyl phosphatidylcholine
Birefringence, 15
Kidney tubules
Absorption, 21
Lipids
Phase diagrams, 393

Water, heavy
Potassium
Biological transport, 193
Kinetic models, 193
Sodium
Biological transport, 193
Ion channels, 193
Ion currents, 193
Kinetic models, 193

Wilson-Cowan equation
Neurons
Threshold functions, 267

Wound healing
Electrolysis
Comparison, animals/plants, 461
Magnitude, 461

X

Xeroderma pigmentosum
Fibroblasts
DNA, 287

Z

Zeaxanthin
Dipalmitoyl phosphatidylcholine
Raman spectra, 221
Distearoyl phosphatidylcholine
Raman spectra, 221
Phase diagrams
Electron paramagnetic resonance, 221
Raman spectra, 221
Phospholipids
Raman spectra, 221
